

# panelform™

*Crafting hearts  
for homes  
since 1992.*

Panelform Prestyle doors and panels give architects and designers the freedom to customise to any colour and finish that you desire; a feature invaluable in a design world that craves distinctiveness and originality.

Already machined and sanded, Prestyle shows off the advantages of Panelform's specialist machinery and expert craftsmen, making them the perfect blank canvases – delivered ready to paint.

The use of moisture resistant (MR) HDF ensures Prestyle keeps its good looks and adds lasting value and elegance to any interior.

**HDF**  
Raw HDF both sides.

**HDF – White Back**  
White melamine on back,  
raw HDF on front.

**HDF – 2 piece**  
Raw HDF both sides, made as  
a frame and an insert glued in.

## Prestyle Doors

### Bronze Series 18mm thick

Lyll

Millburn

Rosedale

Foxhill

Rockville

Panelform Prestyle doors are profiled using a moisture-resistant High Density Fibreboard (HDF) substrate and specialist machinery operated by experienced craftsmen.

Delivered ready for painting, Prestyle doors are either 18mm or 21mm thick and available in three different substrate options.

Prestyle doors are constructed using HDF to ensure the best quality paint finish is achievable. Proudly made right here in New Zealand.

 HDF 2-Piece (Raw Both Sides)

## Prestyle Bar/Back Panels

Island back panels or breakfast bar panels can be made with multiple profiles on a single panel. Often they will incorporate an extended bottom rail instead of having a kickboard.

## Prestyle Flexipanel

Flexipanel is a versatile fluted panel designed to bring fluid form and creativity to your project, enabling the creation of elegant curves and custom-shaped surfaces. Manufactured from high-quality 4mm or 4.75mm MDF, it can be bent to suit both concave and convex radii.

## Drawer Fronts

A Drawer Bank

B Individual Fronts

C Individual Fronts with Split Centre Rails

Drawer sets are available in a number of different options as shown here depending on the style of door selected and the effect that one is wishing to create.

## Glass Frames

Frame only doors have a rebate for a glass pane. Lattice frame doors can have 4, 6, 8 or 10 lites using a single piece of glass.

## Cornice & Skirting

Cornice mouldings can be a great way to finish wall and tall cabinets, with a range of modern and classic profiles.

Skirting mouldings can be used to create a positive moulding detail instead of a traditional kick board.

## About Panelform

Panelform is a family-owned business dedicated to manufacturing the highest quality kitchen cabinet doors in New Zealand since 1992.

Find out more about us and the products we produce at [www.panelform.co.nz](http://www.panelform.co.nz)

## Care & Maintenance

Prestyle doors are made from a moisture resistant HDF, but as with any MDF or HDF product, are not waterproof.

Prestyle doors are supplied as an unfinished product. Speak to your joiner, fabricator or spray painter on recommended care and cleaning of the finished product.

## Important Product Information

As Prestyle doors are supplied unfinished, the following guidelines should be followed to achieve a quality, long-lasting finish:

- Raw HDF is susceptible to heat and humidity. To help prevent bowing, doors should be undercoated within 2 days of receipt. Keep doors covered where possible and avoid direct sunlight.
- Prestyle doors are supplied ready for undercoating. Sanding between coats is required to achieve a premium finish.
- While every effort is made to ensure doors remain straight, some styles, particularly Platinum and Diamond Series designs, and styles with thin frames or lineal profiles, may be susceptible to slight bowing, especially in larger sizes. This is unavoidable and is not considered a defect.
- Prestyle HDF 2-piece construction is available as an option and offers improved strength and straightness compared to raw HDF or HDF White Back options. If bowing is a concern, Panelform recommends choosing HDF – 2 piece.
- In some cases, doors may bow slightly during painting. Panelform recommends allowing painted doors to cure for 48 hours, as doors will often straighten as the paint cures.

## 10 Year Guarantee

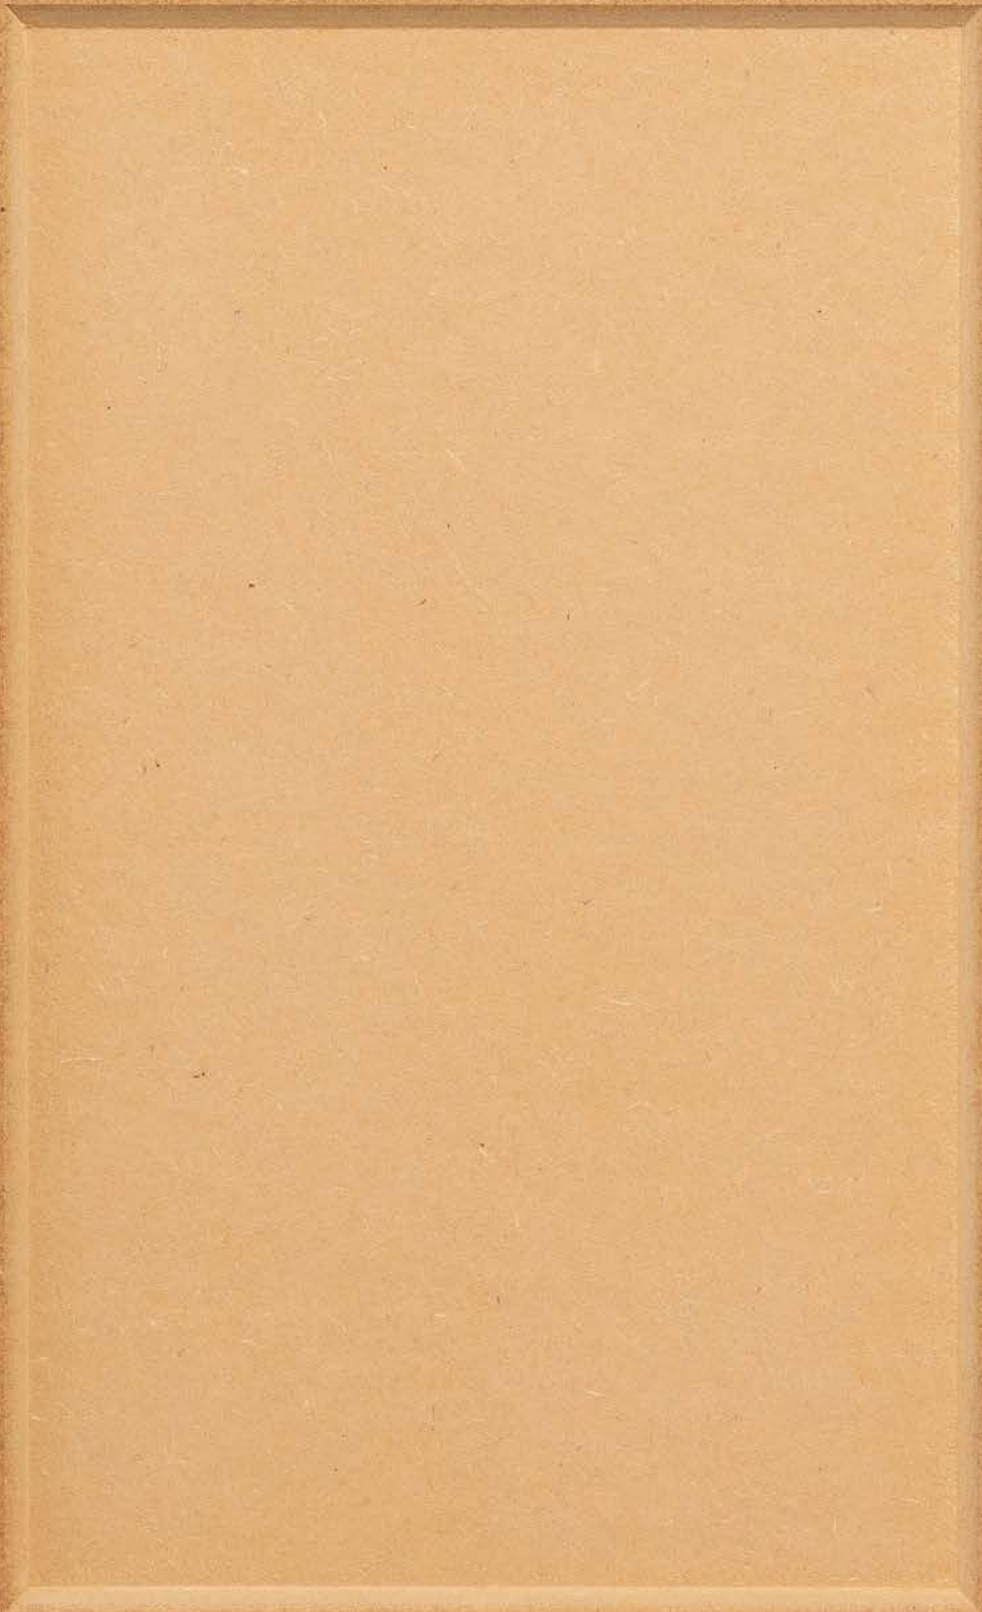

Panelform has full confidence in our design and workmanship and will guarantee this in all our products for 10 years, subject to the following terms and conditions.

- This guarantee is subject to compliance by the consumer with all Panelform's terms regarding the installation, care and maintenance of our doors.
- Panelform will not be liable for any defects or faults resulting from the acts or omissions of anyone other than Panelform or for any cause independent of human control occurring after the goods have left Panelform's control.
- Any claim shall not exceed the original purchase price of the doors or panels manufactured. Panelform will not meet any additional costs of reinstatement or refitting of doors or panels.
- Panelform must be advised in writing of any claim under the terms of this guarantee within 10 years of the date of manufacture of the products.
- The claim is made by the original purchaser of the products.

This guarantee is in addition to the guarantees as contained in the Consumer Guarantees Act 1993 and does not in any way limit the rights which may be available to the consumers under that Act.
